

Classic Hearth Vent-Free Gas Fireplace Systems

COME IN FROM THE COLD

VANGUARD[®]

FULL SIZE CLASSIC HEARTH FIREPLACE SYSTEMS . . . CREATE A FIREPLACE INSTANTLY.

Fireplace Beauty with The Efficiency Of Vent-Free Technology

Classic Hearths provide up to 36,000 Btu of clean, quiet, odorless heat. Enough to heat up to 1,200 square feet for only pennies an hour. With Classic Hearth's clean burning, 99% heat efficient burner design, the gas fireplace operates without a chimney. No outside venting is required so you eliminate heat loss and cold air drafts.

A Vanguard Classic Hearth Vent-Free Gas Fireplace System offers you the most economical and convenient way to add the beauty of a fireplace to your home.

A Classic Hearth gives you the attractiveness of a real wood burning fireplace with the heating efficiency and warmth of vent-free gas space heating. No chimney or venting is required so installation is a fraction of the cost of installing a wood burning fireplace. Also, since a Classic Hearth operates without electricity, it is the perfect alternative for emergency heat during power outages.

These complete systems include a zero-clearance fire-box, high efficiency vent-free gas logs, black louvers and concealed controls. Choose between thermostatic or remote control ready models. Optional multicolor brick liners in standard or herringbone patterns plus several mantel and hearth base designs are available.

The Ultimate In Heating Comfort

There are a variety of models so you can select the comfort setting that best suits your needs. The thermostatically controlled model will automatically modulate to maintain your desired heat output, while the manually controlled model allows you to select the heat setting and flame height you prefer. Classic Hearths that are remote ready offer you the choice of two types of optional remote controls as well as the ability to operate the fireplace with a built-in variable manual control.

Mini

The new Mini-Classic (VGMR) is a small 10,000 BTU, remote-ready gas fireplace that comes in a convenient go-anywhere size. Attractive red ceramic fiber liner and arched screen come standard.

Bedroom Compact

The Bedroom Compact Classic Hearth has been specially engineered to produce a spectacular flame at only 10,000 Btu. Perfect for smaller rooms (like a bedroom), this fireplace is available with optional wall or corner mantels.

Single Burner 26" Compact

The Single Burner Compact Classic Hearth is offered in both thermostatic and remote-ready models. The 26,000 Btu fireplace features realistic dancing yellow flames and a shallow depth for go-anywhere installation.

Dual Burner 26" Compact

The Dual Burner Compact Classic Hearth is a 26,000 Btu fireplace which features two rows of dancing yellow flames and is available with your choice of thermostatic or remote ready controls.

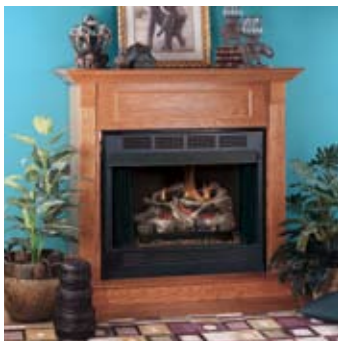

Classic Hearth 32"

The Classic Hearth Fireplace System (VYGF33 and VSGF28/33) is a complete package: It includes the zero-clearance fireplace, plus a set of vent-free gas logs. A series of cabinet-mantels are available as accessories.

Total Control System 32"

The Total Control System (VTGF33) is a truly innovative gas fireplace. Remote control and blower are included. The remote will not only control the flame and heat, it will even light the pilot light.

Classic Hearth 36"

The Classic Hearth 36" Fireplace System (VSGF36) is designed for larger spaces, and boasts a handsome arched screen front and the Blaze 'n Glow gas logs. A series of cabinet mantels are available as options.

NOW THERE'S A CLASSIC HEARTH FOR EVERY NEED

(Top) The new Mini-Classic is a small, bedroom-approved fireplace. Cabinet mantels are available in wall or corner mantels. (Right) The Single Burner Compact Classic will fit almost anywhere.

Mini-Classic (VGMR): In many homes, finding enough space to have a fireplace can be challenging. The new Vanguard Mini-Classic is the perfect solution. It is a small 10,000 BTU, remote-ready gas fireplace that will take up very little room. The 10,000 BTU output is a perfect heat range to provide comfortable heat for one or two rooms. This fireplace is approved for bedroom applications. Custom sized cabinet-mantels are available as well, in both wall and corner versions. Attractive red ceramic fiber liner and arched screen come standard.

- Zero clearance construction
- Approved for bedroom use
- 99% efficient
- Arched screen
- Options include remote controls and cabinet-mantels

Bedroom Compact (VMH10): Another option for bedroom or small heating space applications is the Bedroom Compact Classic Hearth. This model comes in two versions: a thermostatic model that operates according to a desired heat level, or a remote-ready model (remote controls are optional). All 26" cabinet-mantels fit this model.

- Approved for bedroom use
- Up to 10,000 BTUs
- 99% efficient
- Thermostatic or remote models available

Dual Burner Compact Fireplace System shown with a black cabinet mantel with natural stained top. (VDCF, WS26CP)

Compact Classic Hearth – Single Burner 26" (VMH26): When space is at a premium a Vanguard Single Burner Compact Gas Classic Hearth System is the perfect choice. Enjoy all of the same features and benefits of a full size Classic Hearth. These complete systems include a zero-clearance compact firebox, vent-free split oak gas logs, black louvers and concealed controls.

- Up to 26,000 BTUs
- 99% efficient
- Either thermostatic or remote models available
- Accessories include Designer Faces, cabinet-mantels and blowers

Compact Classic Hearth – Dual Burner 26" (VDCF): Vanguard's Dual Burner Compact Classic Hearth System is one of the most exciting ideas in compact heat to come along in quite a while. The dual burner offers a nice "step-up" from the single burner and is ideal for mid size rooms. The deeper firebox, full size log set and two rows of flames provides a more realistic fireplace appearance. The larger, more detailed column cabinet mantel/base combination gives the appearance of a full size mantel and base. Add in the arched screen, a look borrowed from the full size Classic Hearth, and you have a perfectly priced and positioned fit between the single burner compact and full size Classic Hearth line.

- Up to 26,000 BTUs
- 99% percent efficient
- Options include Designer Faces, cabinet-mantels and blowers
- Thermostatic or remote models available

Classic Hearth 32" (VSGF28/VSGF33/VYGF): The Vanguard Classic Hearth is a full-sized 32" fireplace system complete with zero-clearance firebox, gas log set and concealed controls. The 32" Classic Hearth is available in two log looks: The Flame-Max model has Golden Oak Logs with two rows of yellow flame. The ChaRealistic Classic Hearth has Blaze 'n Glow logs, with an innovative ramp burner that more closely replicates a wood fire.

Flame-Max Classic Hearths are equipped with remote ready controls. The optional manual or automatic blower can be installed to improve heat distribution. These fireplaces offer 33,000 Btu, enough to heat up to 1,100 square feet.

A ChaRealistic Classic Hearth allows you to enjoy the realism of full size Blaze N' Glow logs and glowing coals featuring outstanding log aesthetics. A full set of black upper and lower louvers is standard with these models.

The thermostatically controlled model is equipped with an automatic variable speed blower, while the remote control ready models accept a blower accessory. Thermostatically controlled models offer 28,000 Btu, the remote control ready models offer 33,000 ... enough to heat up to 1,100 square feet.

The Flame-Max Classic Hearth features 24" Golden Oak Logs and brilliant yellow flames. Shown recessed with a custom mantel and the optional firebox perimeter brass trim. (VYGF33R, PT32PB)

The Total Control System offers the ultimate in convenience, with a standard remote control, which can light the pilot.

Total Control System (VTGF33): Gone are the days when you had to stoop down or lie flat on the ground to light your pilot light or control your heat output. With Vanguard's new Total Control System Technology (TCS) Classic Hearth it's as easy as the push of a button on the hand held remote or wall switch.

The TCS technology does require electricity to operate the fireplace remotely. However, it will operate in a manual control mode when electricity is not available, just like the other Classic Hearth Fireplace Systems.

This fireplace system offers the same great features as the standard ChaRealistic Classic Hearth - with the most realistic log set in the industry. The Glowing Oak features a state of the art ember bed, full 32" size firebox, dynamic dancing yellow flames and glowing coals, black louvers and concealed controls. The system also includes a wall switch and hand held remote control. An optional manual or automatic blower can be installed to improve heat distribution.

The TCS Classic Hearth delivers 33,000 Btu of vent-free heat enough to cover 1,100 square feet.

36" Extra-Large Classic Hearth (VSGF36): The 36" Classic Hearth will be a showpiece in any setting. Our largest vent-free fireplace system, the Vanguard 36" Classic Hearth features the Blaze 'n Glow logs, with its innovative ramp burner for greater glow. A variable speed blower comes standard, for greater heat distribution. Specialized accessories include decorative faces, cabinet-mantels and remote controls.

Safety Features Built Into Every Fireplace

Vanguard's Classic Hearth Vent-Free Gas Fireplace Systems are designed certified by the American Gas Association and meets or exceeds all regulations and safety performance standards for vent-free gas appliances. Additionally, these fireplaces perform well within nationally recognized guidelines for indoor air quality. The dual purpose safety pilot system protects against oxygen depletion and any interruption in the fuel supply. If either occurs, it shuts off the gas flow to the burner turning the heater off. An internal pressure regulator controls fluctuations in your gas pressure. These features ensure clean and reliable heat without the worry and inconvenience of vented gas logs or burning wood.

Vanguard Vent-Free Gas Products Meet or Exceed Nationally Recognized Standards/Guidelines for Indoor Air Quality.+

IMPORTANT

Installation must be done by qualified service persons.

Read Owner's Manual before using.

Check local codes and ordinances for permitted uses.

Vent-free gas products are prohibited for bedroom and bathroom installation in Massachusetts.

All products approved for manufactured (mobile) home installation.

We reserve the right to amend product specifications without notice.

Operating heater at very high elevations could cause nuisance outages.

Use with adequate air (ventilation) only. Humidifies while it heats. Provides water vapor in the area heated. Refer to owner's manual for specifics.

Product cannot be converted between fuel types.

The only warranty we offer is our standard warranty. Please read the warranty for any limitations or disclaimers.

All parts have a limited four year warranty.

Stainless Steel burners carry a limited five year warranty.

All accessories have a one year warranty.

+ Per the findings of the American Gas Association Research when installed and operated per DESA's instructions.
